

The ultimate solution for transporting people and cargo safely together

Northern Truck Bodies in conjunction with Snoeks Automotive B.V., the double cabin specialist for Europe has developed a double cabin especially for the Fiat Ducato.

By adding a second seat row with in integrated partition wall it is possible to convert your closed panel van into a double cabin at all times. The perfect solution for the combined transport of people and material. Safe, comfortable and efficient.

# THE ULTIMATE SOLUTION FOR TRANSPORTING PEOPLE AND CARGO SAFELY TOGETHER

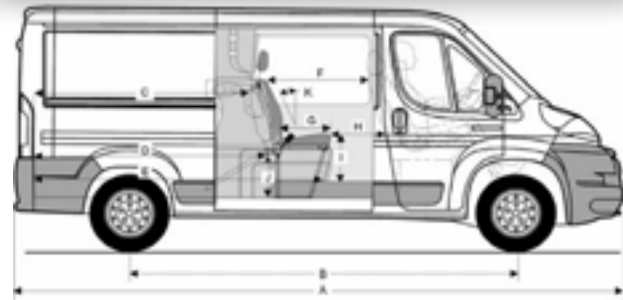

Obviously the double cabin applies to the highest European safety standards. The construction is N1/M1 approved by 20G pull tests on frame and seatbelt connection points. The integral height adjustable and tilting headrests are fully M1 tested. The seats are equipped with approved threepoint seatbelts. The separation wall is designed to meet the DIN 75410-3 standard for load shifting protection.

Next to safety, comfort is one of the starting points of the development process. The location of the bench has been worked out in a way that both leg room and load area are maximized. The deep seat, the high seatback and the inclination of the seatback are resulting in an unequalled comfort. Besides this the double cabin offers several (optional) stowing pockets.

Design also plays an important role when NTB develops a double cabin. Materials and shapes are as close to OE-design as possible, including floor, side wall covers and headlining. The fine designed partition wall separates load and passenger compartment completely. Additional load space under the rear passenger bench extends the load area to allow practical storage of longer items like ladders.

## DIMENSIONS

## STANDARD ACCESSORIES

- High-strength ABS-plastic
- In height adjustable and tilting head rests (fabric or rubber)
- Luxury design partition wall and window incl. Fiat logo
- Floor heightening and step-in cover left hand side
- Bench cover with pocket
- Floor covering rubber 2nd seat row
- Additional load space from behind under the seats
- ABS-plastic cover under- and topside right side wall
- Pocket in partition wall, left side
- Ashtray and cupholder right side wall
- Three seat bench with 3x3-point seat belts
- Headlining ABS-plastic with cloth
- Cushion set with original fabric
